VS Code: Productivity and Customization

Version Check

Version Check

This course was created by using:

- VS Code 1.100.3
- Java 21
- Git 2.50

Version Check

This course is 100% applicable to:

- Visual Studio Code 1.100 or higher
- Java 11 or higher
- Any version of Git 2.x

Relevant Notes

A note on frameworks and libraries:

- VS Code and VS Code extensions may update frequently; however, this course is foundational and should not be impacted by the changes.

Selecting Extensions for Your Development Workflow

Start with extension packs

**Follow a strategy for
choosing the best
extensions for your
development**

Development Workflow

**Project
creation**

**Feature
development**

**Build
automation**

**Automated
testing**

**Prefer extensions where the
publisher is verified**

**Prefer extensions with a
good reputation**
